

MOHD AYMAN ANSARI

Bareilly, Uttar Pradesh | +91 9557064455 | ansariaymaman38@gmail.com
github.com/Ayman10714

PROFESSIONAL SUMMARY

Full-stack Software Developer skilled in Python, FastAPI, React, C#, .NET/ASP.NET, and SQL Server — front end to backend, REST APIs to cloud databases. Shipped a production-style full-stack app end to end, independently resolving real-world deployment and integration challenges along the way.

CORE TECHNICAL SKILLS

Programming: Python, C#, HTML, CSS, JavaScript, TypeScript

Web Development: React.js, FastAPI, ASP.NET Web Forms, .NET Framework, HTML5, CSS3, JavaScript, jQuery, Tailwind CSS, Responsive Web Design

Backend & APIs: REST API Design & Integration, Async/Await Programming, Web Services, Backend Development, Clean & Maintainable Code

Databases: SQL Server, MongoDB, Cloud Databases (MongoDB Atlas), SQL, DBMS, SQL Joins, Stored Procedures, CRUD Operations, Database Management

Tools & Platforms: Git/GitHub, Postman, VS Code, CI-friendly dev workflows

Software Engineering: Debugging, Data Structures & Algorithms, Agile/Sprint Processes

Architecture: Multi-Tenancy SaaS Architecture

PROFESSIONAL EXPERIENCE

Web Developer | appwebzone | Bareilly, India

February 2026 – August 2026

- Built responsive, cross-browser web pages with HTML5, CSS3 and JavaScript from client requirements and mockups.
- Added interactivity with jQuery and developed backend logic/web services in Python.
- Participated in Agile sprints — planning, stand-ups, and consistent task delivery.

EDUCATION

Bachelor of Computer Applications in Computer and Information Sciences

MJPRU, Bareilly | Expected July 2028

Class 12

CBSE, Bareilly, Uttar Pradesh, India

PROJECTS

Jarvis REST API — *Python, REST APIs, Voice Recognition*

- Voice assistant exposing commands/responses via REST API, with endpoints for NLP input and structured output.

AI Chat Reply Box — *Python, AI/OpenAI API, HTML, CSS, JavaScript*

- Web-based chat tool sending user messages to an AI API with real-time responses; Python backend, JS front end.

NameNest — Brand Name Availability Scanner — *Python, FastAPI, MongoDB, React, Tailwind CSS*

- Full-stack app checking brand/name availability across domains, GitHub, social platforms, and USPTO in one query.
- FastAPI + MongoDB Atlas backend with caching; React/Tailwind frontend with search history and error handling.
- Built a name-suggestion engine scoring alternatives by real-time domain/GitHub availability; resolved CORS, async, and cloud DB issues to ship end-to-end.
- **GitHub:** <https://github.com/Ayman10714/NameNest>
- **Live Demo:** <https://namenest-ilib.onrender.com/>

Banking / Account Management System — *ASP.NET, SQL Server, C#*

- Banking simulation with account creation, deposits/withdrawals, and real-time balance tracking via SQL joins and stored procedures.

Interest Automation System — *ASP.NET, C#, SQL Server*

- Automated interest calculations across accounts with server-side C# logic, reducing manual entry.

Dynamic Data Website — *ASP.NET, SQL Server*

- Data-driven pages with server-side rendering, date/month filtering, and ViewState-based page state.

SOFT SKILLS

Problem Solving & Analytical Thinking • Team Collaboration • Communication • Time Management • Adaptability • Attention to Detail

CERTIFICATIONS & ADDITIONAL LEARNING

C# Programming • ASP.NET Web Development • SQL (Beginner–Advanced) • AI Tools & Prompt Engineering • Digital Marketing Basics • Data Structures & Algorithms • Advanced Python (OOP, exception handling, file I/O, modular programming) • DBMS Fundamentals

LANGUAGES

English – Upper Intermediate (B2)
